Synopsis: A 3D film for all the family. "We will tell Orwell's classic tale as a vibrant engaging story for 21st Century families. Just imagine Orwell writing today... seeing the entire story from the point of view of an adorable knee-high piglet... A rite of passage for this once naïve, baby-face piglet Lucky, son of Napoleon, as he witnesses the rise and fall of a dream: a perfect existence without human beings. A modern commentary of the perils of corporate greed, but with all the innocence, joy and sensitivity of a fairy-tale. Just great fun, anarchic, contemporary, quick-witted and very funny ... but also fearful, whereby jeopardy is in the unseen implied violence; raucous, thrilling with big set pieces; but also subtle - with incisive subversion and satire; heartbreakingly honest, accepting of sadness and emotionally ebullient" . Synopsis: Of the many mysteries swirling around Cuba, there's one that has captured the imagination of cubaphiles, auto-enthusiasts, and dreamers: What happened to Ernest Hemingway's car? Exactly fifty years after the Nobel-prize-winning author departed Cuba - his home for 22 years - his long-lost 1955 Chrysler New Yorker convertible has finally been found, derelict and near to ruin. Cuba's vast repository of classic American automobiles is synonymous with the surreal and sensual nation, and Hemingway's much sought-after vehicle is potentially the most valuable and important of them all. The story is a fascinating insight into contemporary Cuba - an irresistible yet much-misunderstood Communist island of eccentricity, eroticism, and enigma, in which Hemingway is considered a national treasure and baseball is the national sport... serving alongside the beloved Detroit classics - from creaky Cadillac taxis to Chevrolet Impalas with fins sharp enough to draw blood - as ambassadors of an abiding affection that still binds the two nations together.

His world shattered, Jacques returns home only to discover Stella unconscious following a binge on junk food, booze and pills. Recognising a fellow lost soul, Jacques refuses to leave Stella's side until she consumes something. He sets them both a challenge: for him to prepare her a feast so delicate and alluring that she cannot resist. He has woken up in an abandoned farmhouse, with blood on his shirt, and no memory of how he got there and, more importantly, no idea whose blood it is. Not that the sight of blood is new to Tony. After all, he is the son of one of the most notorious gangsters in London, Terry. Is it any wonder that Tony would follow in Terry's criminal footsteps? Throughout Tony's life, he witnessed the brutal acts Terry committed on others, especially Tony's Italian-born mother. Tony leaves the farmhouse to search for a telephone to call his gang. He still has no idea where he is or how he got there. He stumbles into a small town and discovers he's in an Italian village that seems to be lost in time. There are no phones and, as a stranger, no one will talk to him, except for one kind man. As Tony tries desperately to put together the pieces of how he ended up in this small Italian town, Francesco tells Tony of his own troubles. Francesco has a grand-daughter who is foregoing a promising career as an artist to travel Europe with a British boy she has fallen in love with. The boy is a hustler and Francesco worries his daughter is making a huge mistake. Long term friend and partner Sergeant Harris arrives with a plan to secure Powell's release. But his freedom comes at a price: the completion of a new, even more dangerous assignment, working for a mysterious sponsor. Chosen for his precision, specialist skills, and absolute discretion, Powell is hired to lead a team deep into a former Soviet State, now in the grip of a violent political revolt. Accompanied by six former elite soldiers, and Jennifer Healy - the steely representative of the mission's mysterious backer - the team advance through a harsh and unforgiving forest. They must use surveillance, stealth and wit to pose as local workers in order to infiltrate a heavily-armed military base. They continue deeper into the pits of the earth, rapidly gaining access to the hi-tech underground bunker which lies a half mile below. Leaving team-member Williams in the control room in the uncomfortable company of armed militia, Powell and the team infiltrate the base through a series of tunnels, lifts and stairways, threatened by menacing shadowy figures who drift in and out of vision, attempting to pick off the team with the poisonous syringes they wield. Evading their macabre stalkers, and with Williams protecting their backs as best he can, our rough and tough heroes soon reach the secret subterranean biotech laboratory. They soon discover this facility has been paid for with the unlimited dollars of a supreme oligarch and houses Dr Irvine, an exceptional scientist. Her research with Alien DNA is revolutionary, yet it breaks every law and medical code in its aim to create a perfect, genetically engineered human race. The results are extraordinary and the potential applications will be worth billions. This could change the world as we know it, but at what price and on whose decision? As tensions and mutual suspicions mount, game-plans are played out. Healy is revealed to have previously assisted Dr Irvine in the research facility, and the backers of this mission have recruited her to find the live specimens and secure them at any cost.
